Continuous and unrivalled, backed by effective warai issue handling.

CUSTOMER RELATIONSHIP MANAGEMENT

CRM

-  Efficient and Timely Services
-  Highest Level of Customer Satisfaction
-  Fully Understand the Customer Needs
-  Continuous Monitoring, Tracking & Reporting
-  Optimal Resource Utilization
-  One Time & Under-One-Roof Service Program
-  Daily Inventory Reports
-  Special Handling & Care for All Shipments

STANDARD OPERATING PROCEDURE

Origin

1. Origin

2. Field Operation

3. Destination

- Maintaining pickup time.
- No pick-up without proper company seal & invoice papers; any discrepancy is highlighted to the consignor immediately.
- Tally on entire pickup before loading the vehicle.
- Co-ordinating with consignor (customer) for data transfer for further process.
- Vehicle sealed at the consignor point itself.
- Challan or manifest prepared while dispatching the vehicle.

Field Operation

1. Origin

2. Field Operation

3. Destination

- Maintaining delivery cutoff for timely delivery.
- Delivery-wise (route) shipments arranged in vehicle to avoid discrepancy and delay.
- No open delivery (as per NOM).
- Customer updated on the intact (sealed) condition before opening the shipment, to avoid discrepancy — six-side check.
- Vehicle locked properly during delivery attempts to avoid pilferage.
- For undelivered shipments, proper reason captured on the delivery sheet (customer voice).

Destination

1. Origin

2. Field Operation

3. Destination

- Vehicle seal checked as per challan or manifest.
- Paperwork and manifest tallied against the physical shipment.
- Discrepancy, if any, highlighted immediately.
- Confirmations on data received from consignor.
- Paperwork thoroughly checked before forwarding to final destination for further process or clearance.
- Proper checkpoint captured in system before forwarding.
